

PROJECT STATUS REPORT	
<b>Project Name</b>	Freight Shield
<b>For Week Ending</b>	Feb 5th
<b>Project Status</b>	Status: Yellow 😐
<b>Status Description</b>	<p>Was able to make some significant progress with application features and user testing, especially after how last week went</p> <p>In order to get to greenL</p> <ul style="list-style-type: none"> <li>• Schedule more testing with clients (specifically, doing carrier and admin tasks, following the plan)</li> <li>• Make changes based on current feedback</li> <li>• Implement communication between the web client and mobile application</li> </ul>
<b>Activities—During the Past Week</b>	
[List all activities that the team members worked on during the past week of the project.]	
<ul style="list-style-type: none"> <li>• Made a R/ABC chart and a basic User Testing Plan (too late for testing though)</li> <li>• Implemented a lot of functionality for Carrier and Shipper Pages</li> <li>• Made logbook submission on mobile application to work, creates a file on the local database for it</li> <li>• Set up remote endpoints, still need to deploy the site on it</li> <li>• Did some basic user testing with customers from Light Speed (carrier/shippers) and 1005042 Alberta Ltd (an owner/operator)</li> </ul>	
<b>Activities—Planned for Next Week</b>	
[List all activities that the team members will work on during the next week of the project.]	
<ul style="list-style-type: none"> <li>• Implementing feedback from current user testing</li> <li>• Recontacting and going through more testing, this time using the user testing plan (which definitely still needs work)</li> <li>• Creating a code testing plan and report</li> <li>• Connecting the web client and mobile application, making sure they use the same backend and can communicate over it (such as periodically sending location</li> </ul>	

updates, assigning jobs)

### **Project Issues**

- Currently using a separate backend for the mobile application, still having issues with connecting to the main one
- Had some issues with some of the document formats, the software/user test plans and R/ABC chart, took the best shot
- Some new bugs with the modal overlay and not displaying items correctly
- Managed to deploy the software to the server endpoints, but came across with an issue of theme breaking
  - Will be setting up meeting with Dr. Sharma to understand this problem

### **Project Changes**

- Splitting up the project work into sections, each person has a specific category to work with more exclusively
  - Mohammed is focusing on the mobile application
  - Ramanpreet is focusing on web application frontend
  - Aman is focusing on web application backend and bug fixes
  - Alok is focusing on writing documentation
- Also some changes with how some of the carrier pages work with different forms, more minor
